

The Future of Cumulus Parametrisation

A Community Workshop - Save the Date

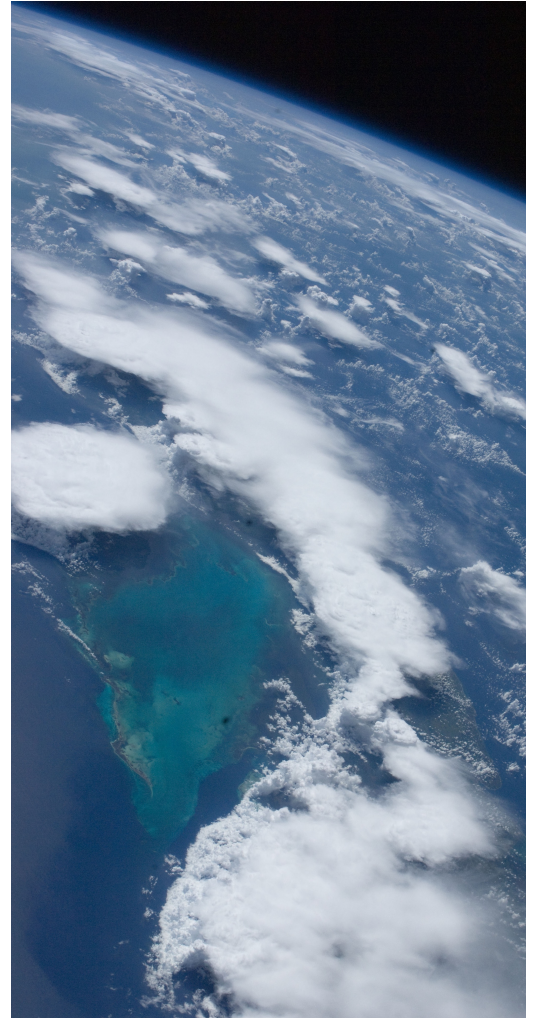

When: 3-7 July 2017

Where: University of Technology, Delft,
The Netherlands

Why: Cumulus parametrisation is at
the heart of many model problems
and progress has been slow. We
need a plan or do we?

Who: Anyone interested in
contributing to our thinking on how
to improve the representation of
convection in models.

More info soon.

Themes and Sessions:

- Insights from Observations and Modelling
- Convective Organization
- Convective Transitions
- Stochastic approaches
- The grey zone
- The future: where to and how?
