

# University of Cologne material in the container

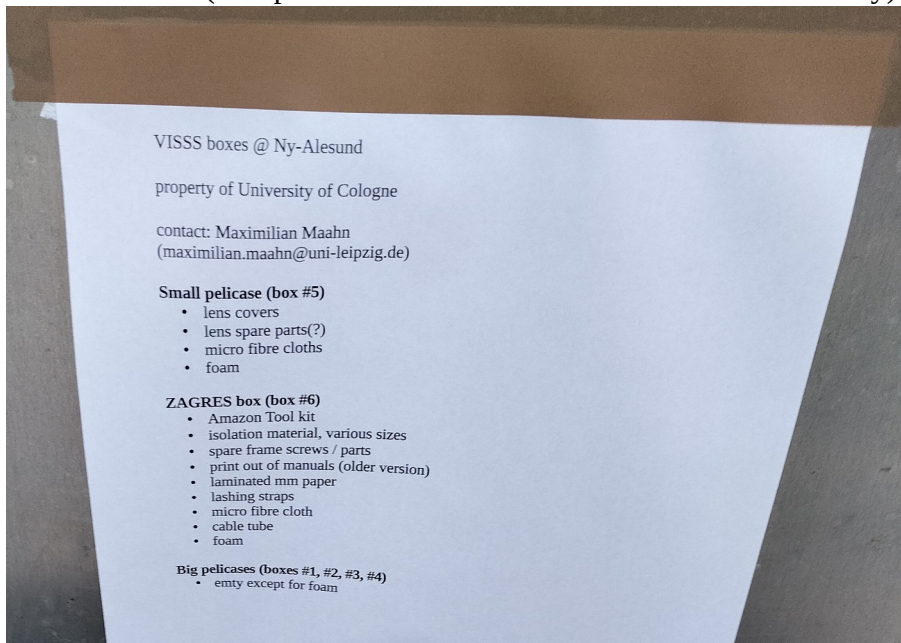

14.10.2021

Added today:

## **VISSS box 1-6/6**

*4 bigger pelicanses, 1 smaller pelicase, 1 zargesbox*

Materials in side: (except Amazon tool kit was taken to the observatory)

## **NYRAD box 1/3**

*black pelicase*

- packing material
- weather station box

## **NYRAD Radar+calibration table**

*flight case*

- calibration table
- possibly: straps, other radar material?

## NYRAD scanner 1-6/6

six pieces of wood that together make a box

Already inside:

### JOYRAD Box 1/2

*flight case*

- packing material

### JOYRAD Box 2/2

*flight case*

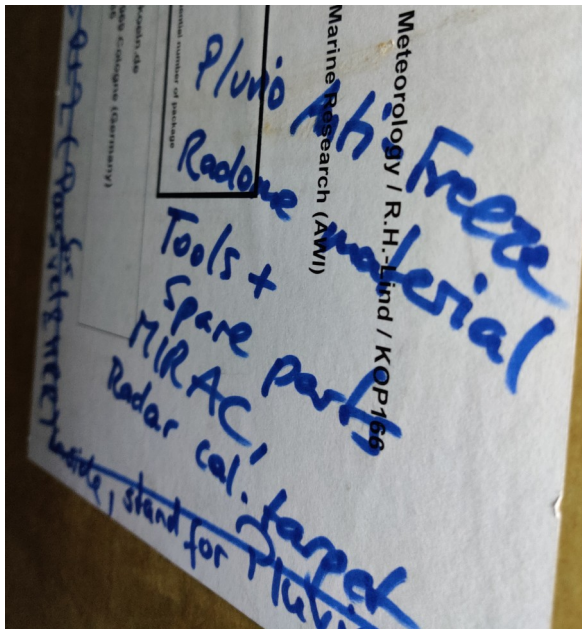

- did not look inside, note from our logs (probably not up to date):

Box 2 contains:

- 1 calibration target (white foam box with black foam inside)
- 2 spare radar radomes
- 1 data fiber cable for radar
- 1 toolkit in wrapping bag
- 4 carrying handles

### Pluvio Box 1/2

- did not look inside, on the box it says:

### Pluvio Box 2/2

- packing material
- MRR transport case:

All packed nicely :)
